Dear Distributors:

In our new batch of Aloe Fusion and Aloe in Mix we have changed our sweetener from Sucralose to Stevia. Stevia is a completely natural product that, unlike other sweeteners, is harvested from a naturally sweet plant originating in South America. It adds zero calories to a drink yet makes it tastier to drink.

All other ingredients in our Aloe Fusion and Aloe in Mix remain unchanged from our previous batches. We strive to continue to improve our products to bring you the best possible benefit to you.

Why do we choose **Stevia?**

- ✓ Natural plant ingredient Safe for use!
- ✓ Zero Calories!
- ✓ Does not affect blood sugar levels Safe for diabetics!
- ✓ No Damage to your Teeth!
